

Fleet Maintenance Software Service - Vehicle Management

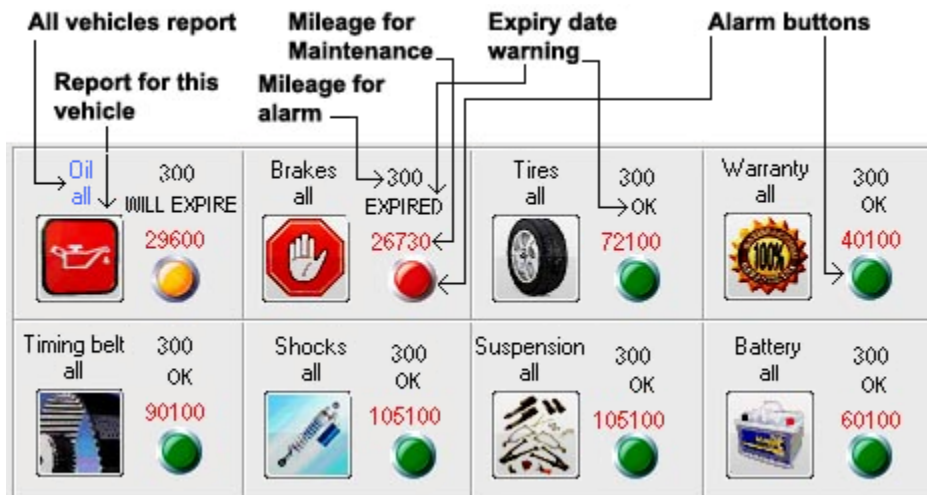

<http://www.adminvehicles.com>

Why should I have this software?

These are some of the advantages of our Fleet maintenance program:

- **How do we have complete control of Vehicles' Maintenance?**
Our system has two separate methods of programmed maintenance:
1 Automatic Maintenance Control which is activated in the Daily Movement module by entering mileage and cost of maintenance. Every vehicle can be configured with different settings for Maintenance in 16 fields (8 fields for oil, brakes, tires, warranty, timing belt, shocks and suspension) and 8 fields to program the mileage to trigger the alarms.
- **2 Maintenance by dates.** For this we simply enter dates and events for maintenance. The system produces alarms and reports.
- **How do we keep track of our fleet maintenance?**
Our maintenance monitor produces sound alarms and colored buttons displaying the condition of Oil change, Brakes, Tires, Warranty, Timing Belt, Shock absorbers, Suspension and Battery.

Alarms can be pre-programmed to be yellow some mileage before the actual maintenance and to go red after mileage is reached. In the monitor example, we change oil every **4000** miles, oil change is due at **29600** so we are within the **300** yellow alarm zone, the alarm button will go red at **29601**.

- **How do I know the mileage of all vehicles in my fleet?**
It is very important to know if our fleet is becoming old; higher mileage will demand more maintenance and repairs. It may be time to sell old

equipment. Our software gives a report on the mileage of all vehicles.

- **Do we keep track of the expiry dates for driver's licenses?**
Our system provides a license expiry report for all drivers and will also trigger an alarm displaying **red** for expired license, **yellow** up to 30 days of expiry date and **green** for license up to date.
- **Do we have accounts for every driver?**
Our program can keep a history of loans, debts, savings or credits for every driver. In the same manner our system can keep an account for every vehicle.
- **Can we track drivers and their vehicles, what about temporal drivers?**
Our program will track drivers and vehicles by dates; we can also assign temporal drivers to be shown in the report.
- **Do we have vehicle checks?**
Our system has a module for vehicle inspections that covers all aspects from documentation and estate of maintenance to the physical condition of the inside and outside of the vehicle. We provide many fields to keep notes.
- **Can I create maintenance orders through the system?**
Yes, our local area network multi user software has this feature enabled.
- **How do I calculate the daily mileage of vehicles?**
The program has a calculator based on mileage from the previous day that gives you the daily mileage and provides reports.
- **Do I have alarms for dates like compulsory insurance and can I have reports for that?**
Our system has 6 audio visual alarms, displaying sounds and showing buttons for the estate of crucial dates, (**expired**, **will expire** and **ok**) There are 3 fields for insurance dates and 3 for other important dates.

Our software produces reports showing when these dates will expire, allowing us to have more control of events.

- **Can I have reports on:
Next Oil change for all vehicles? Next brakes check? Tires replacement? Timing belt replacement? Shock absorbers, suspension? Warranty checks?**
Our software will give you all this information for one vehicle or for the entire fleet. And not only for the main fields of maintenance but for 35 fields of expenses.
- **How do we track expenses?**
Our system can report expenses for one vehicle or the entire fleet for any of 35 fields of expenses for any period of time.
We can provide reports for fuel consumption, oil, brakes, battery, tires, timing belt, gearbox, motor, transmission, electrics, lights, fuel injection,

repairs, bearings, suspension, shock absorbers, others, compulsory insurance, Insurance 2, Insurance 3, registration, affiliation, radio, warranty, parking, fringe benefits, Health cover, loans, mechanic labor, accidents, fines, administration, salaries, tolls and taxes

- **Can I access Vehicle management software using the Internet?**
Yes, we the program can be accessed remotely, we show you how to do it.
- **Can I access my GPS tracking software from the program?**
Yes, our software permits easy access to your satellite monitoring system. We keep track of GPS software websites, user name, password and notes for every vehicle.
- **Any way of knowing when a vehicle didn't work during the month? How do we track when vehicles didn't work because of crashes?**
We have reports for all these events. We also have a module dedicated to keep history of all accidents.
- **Can I keep track of my tires? Any way of reporting dates of purchase, discharge and other important things about tire control?**
Our program has a module for tires; it gives precise reports for tires control.
- **How does the system produce statements of vehicle accounts?**
The Daily Movement module stores all the information on income and expenses, the system produces instant reports of accounting for one vehicle or the entire fleet, for one day, one month or any period of time.
- **Is it easy to create reports?**
Yes, our program is rich in reports; some important reports are available in Access, Word, Excel and Acrobat reader.
- **How do we keep history of accidents?**
Our system will keep a history of all accidents and gives reports by dates for the accidents of one vehicle or the entire fleet, it also gives reports of related Court Hearings.
- **How is the security in a multi user environment?**
The system produces a log of activities which can be audited for security purposes; all modules can be assigned different passwords. Information is always secure. If necessary, the system can be restored easily to the last version when the program closed.
- **How can I be more successful in my industry? How can I cut on management expenses?**
Our system is a time saver. Our prompt and valuable information is always available to save you time and money. Users of the program will have better quality of life. Information is a very powerful tool; our software will be your most appreciated companion.

- **Is it easy to learn to use this software?**
Extremely easy. Our interface is very easy to navigate. Our program comes with a **demo vehicle** so that learning is really easy, all modules provide information on how to use them, you can access our website for support and information pages, watch our videos or ask for technical support anytime.

- **How is this service priced?**
Price depends on the number of vehicles and the type of system: for one computer or multi user purpose. Initial cost includes the first year of service. Annual cost of the software service is 20% of the initial cost.

Our software service includes: license of the program, remote support installation if requested, maintenance, training, monitoring, technical support by email, skype or remote desktop and free updates.

The Program is currently upgraded to commercial standards for large fleets. We also create additional modules which can be acquired separately.

If your fleet grows, you can upgrade to a higher number of vehicles.

- **What if some software modifications are required to suit company needs?**

Please let us know, we will check your needs and give you a quote.

- **Is my information always secure? CHECK THIS**
Completely. The program auto copies itself and compacts when you exit. In case of unexpected software corruption which can happen due to a virus, the system can be restored to the last version when the program closed.

You may also purchase our inexpensive back up software to copy the database to a USB memory device in case you have unexpected damage to the hard disk in your computer or a virus, theft, fire or who knows what.

- **Can I see the software working before I take my decision?**

Yes. You may download demo from our website.

If you want a presentation via skype contact us
